CURRENT BOOK PROJECT: *Hypocrisy in International Politics*

This book provides the first comprehensive analysis of hypocrisy in international relations, blending new theoretical insights with empirical research. Drawing from survey experiments and historical case studies, it investigates the backlash states face for perceived hypocritical behavior and its impact on international cooperation. The study examines U.S. policies on human rights and democracy promotion, China's stance on the Law of the Sea, and Global South countries' posture on climate governance. Offering practical strategies for policymakers, the book explores alternative pathways to manage hypocrisy in global politics.
